

There are many reasons why going to college is important for me and my future plan.

I want to go to college to be able to make more money and get a good job. To get a good job, I would need three or four years of college. I would like to study to be a Venomous Reptile Milker. A Venomous Reptile Maker is a zoologist that takes venom from snakes and other reptiles. Collecting venom helps with research and medical emergencies. Without collecting I would not be able to get this job and make money.

Another few reasons that college is important to me is because it will help with my happiness, finances, and buying a house. Going to college would help my happiness because I can do things for myself, like getting a pet. Being on my own and doing something for myself is important. By going to college I would earn a lot of money if I get a degree. In college, I could buy a house after getting money from my job to be on my own.

College will be hard work but I know that it is important to my future.
